1. **Extract everything from content.zip**
   You should see:
   - **_inc/page.inc.php**
   - **_res/_pages/rules.php**
   - **_res/webmaster/add.php**
   - **_res/webmaster/modify.php**
   - **_res/ajax.php.txt**
   - **_js/radi.js.txt**

2. **Go to _inc/glob.php in cPanel**
   Add the line require_once("page.inc.php");

```
19          require_once( "db.inc.php" );
20          require_once( "core.inc.php" );
21          require_once( "user.inc.php" );
22
23          /* Add-on functions */
24          require_once( "page.inc.php" );
```

3. **Open up**
   - **_inc/webmaster/add.php**
   - **_res/ajax.php.txt**

   Find "/home/jiajiann/public_html/extranet" and replace ALL of them with your document root. Do not replace the "_res/_pages".

4. **Do not replace _res/ajax.php.txt or _js/radi.js.txt, add it to their respective places in _res/ajax.php and _js/radi.js**
